TOXICOLOGY

VOLUME CONTENTS

Volume 71 (1992)

Short Communication

Depression of the Ca^{2+}-ATPase activity of the rat liver endoplasmic reticulum by the liver tumour promoters 1,1,1-trichloro-2,2-(bis(*p*-chlorophenyl)-ethane and phenobarbital **(Both enzyme inducers decrease the Ca^{2+}-ATPase activity to about a third of the control value, irrespective of calcium concentration)**
by G.A. Adenuga, E.A. Bababunmi and R.G. Hendrickse (Ibadan, Nigeria and Liverpool U.K.)..... 1–6

A cytosolic oxygenase activity involved in the bioactivation of 2-aminofluorene **(An NADH dependent cytosolic oxidation step is postulated for activation to a mutagen)**
by M. Leist, A.D. Ayrton and C. Ioannides (Guildford, Surrey)..... 7–20

Effect of 2-acetylaminofluorene on intracellular free Ca^{2+} in isolated rat hepatocytes **(Short-term changes in Ca may not be accompanied by loss of cell viability and changes in cell viability may occur without alterations in Ca)**
by S. Lefebvre, M. Marion and F. Denizeau (Québec, Canada)..... 21–33

Calcium valproate-induced uterine adenocarcinomas in Wistar rats **(Results of a chronic feeding study)**
by J.R. Watkins, A.W. Gough, E.J. McGuire, E. Goldenthal and F.A. de la Iglesia (Ann Arbor and Mattawan, MI)..... 35–47

Inhibition of mitochondrial respiration and oxygen-dependent hepatotoxicity by six structurally dissimilar peroxisomal proliferating agents **(Local toxicity is correlated to inhibition of respiration)**
by B.J. Keller, H. Yamanaka and R.G. Thurman (Chapel Hill, NC)..... 49–61

Effect of the fungicide benomyl on xenobiotic metabolism in rats **(Benomyl shows route-independent effects on mixed function oxidases and is not hepatotoxic)**
by R.R. Dalvi (Tuskegee, AL)..... 63–68

Effect of inhaled methanol on pituitary and testicular hormones in chamber acclimated and non-acclimated rats **(In order to observe hormonal changes, exposure to 5000 ppm or more of methanol is required)**
by R.L. Cooper, M.L. Mole, G.L. Rehnberg, J.M. Goldman, W.K. McElroy, J. Hein and T.E. Stoker (Research Triangle Park, NC)..... 69–81

Renal metallothionein metabolism after a reduction of renal mass. I. Effect of unilateral nephrectomy and compensatory renal growth on basal and metal-induced renal metallothionein metabolism **(Following nephrectomy, the remnant kidney has an increased capacity to synthesize metallothionein)**
by R.K. Zalups and M.G. Cherian (Macon, GA and Ontario, Canada)..... 83–102

Renal metallothionein metabolism after a reduction of renal mass. II. Effect of zinc pretreatment on the renal toxicity and intrarenal accumulation of inorganic mercury **(Zinc pretreatment protects remnant kidneys from inorganic mercury poisoning)**
by R.K. Zalups and M.G. Cherian (Macon, GA and Ontario, Canada)..... 103–117

Inhibition of the activity of glutathione peroxidase by tertiary-butylhydroperoxide in cultured Chinese hamster cells and the role of cellular glutathione in the recovery of the activity **(Glutathione depletion enhances inhibition of glutathione peroxidase activity by tertiary butylhydroperoxide and delays recovery)**
by T. Ochi (Kanagawa, Japan)..... 119–127

Species differences in the hepatotoxicity of coumarin: A comparison of rat and Mongolian gerbil **(After 125 mg/kg there is no damage in gerbils and little in rats but 150 mg/kg are given only to rats and show consistant lesions)**
by J.H. Fentem, J.R. Fry and N.W. Thomas (Nottingham, U.K.)..... 129–136

Studies on valproate-induced perturbations of neurulation in the explanted chick embryo **(The animal model of the explanted chick embryo is suitable to demonstrate teratogenic effects of valproate)**
by P.G. Kelly and C.M. Regan (Dublin, Ireland)..... 137–144

The effect of hexane on the ventricular fibrillation threshold of the isolated perfused rat heart **(Chronic in vivo application lowers the fibrillation threshold and cardiac magnesium, potassium and zinc)**
by S.M. Khedun, B. Maharaj, W.P. Leary and C.J. Lockett (Durban, South Africa) 145–150

Cytosolic long-chain acyl-CoA hydrolase, a suitable parameter to measure hepatic response to peroxisome proliferators **(The usefulness of this biochemical marker for peroxisome proliferation is analyzed)**
by Y. Kawashima and H. Kozuka (Toyama, Japan) 151–160

Cadmium's action on NRK-49F cells to produce responses induced also by TGFβ is not due to cadmium induced TGFβ production or activation **(The target for the inhibitory effect of cadium remains to be determined)**
by N. Tang and M.D. Enger (Ames, IA) 161–171

Effect of oral administration of 1,3-diphenylguanidine on sperm morphology and male fertility in mice **(There is no reprotoxic effect)**
by H.B.W.M. Koëter, J.-F. Régnier and M.W. van Marwijk (Zeist, The Netherlands and Paris-la-Défense, France) 173–179

Nickel-induced hyperglycaemia: the role of insulin and glucagon **(A nickel-induced imbalance between both hormones causes hyperglycaemia)**
by J. Cartañà and L. Arola (Tarragona, Spain) 181–192

Altered distribution of ^{109}cadmium in mice during viral infection **(4 days after virus CB3 inoculation the amount of intravenous cadmium in the kidney is increased 1.5-fold over controls)**
by N.-G. Ilbäck, J. Fohlman, G. Friman and A.W. Glynn (Uppsala, Sweden) 193–202

Cellular localization and hormonal regulation of 7,12-dimethylbenz[*a*]anthracene mono-oxygenase activity in the rat ovary **(Xenobiotic metabolism and hormone formation was studied in cell populatoins separated by density centrifugation)**
by M. Bengtsson, F.P. Reinholt and J. Rydström (Huddinge and Stockholm, Sweden) 203–222

Alteration in surface structure of Clara cells and pulmonary cytochrome *P*-450b level in rats exposed to ozone **(Morphological changes in Clara cells parallel alterations in pulmonary cytochrome *P*–450 content)**
by E. Suzuki, Y. Takahashi, S. Aida, Y. Kimula, Y. Ito and T. Miura (Tsukuba, Tokorozawa and Yokosuka, Japan) 223–232

Comparative tumor-initiating ability of 7*H*-dibenzo(*c*,*g*)carbazole and dibenz(*a*,*j*)acridine in mouse skin **(Quantitative data on tumor promotion and skin morphology)**
by D. Warshawsky, W. Barkley, M.L. Miller, K. LaDow and A. Andringa (Cincinnati, OH) 233–243

Contribution of acetone and osmotic-diuresis by streptozotocin-induced diabetes in attenuation of cephaloridine nephrotoxicity **(In diabetic rats, reduced cephaloridine toxicity cannot be explained by glucose-mediated osmotic diuresis and acetone accumulation)**
by M. Valentovic, J.G. Ball and D. Anestis (Huntington, WV) 245–255

Placental aryl hydrocarbon hydroxylase activity and placental calcifications **(Indirect evidence shows that AHH induction causes calcifications)**
by G. Huel, F. Girard, C. Nessmann, J. Godin, P. Blot, G. Bréart and T. Moreau, (Villejuif, France) .. 257–266

Effect of cadmium on the monolayer maintenance of vascular endothelial cells in culture **(In an endothelial monolayer in cell culture, cadmium increases cell detachment and inhibits proliferative repair responses)**
by T. Kaji, A. Mishima, C. Yamamoto, M. Sakamoto and F. Koizumi (Kanazawa and Toyama, Japan) 267–276

Protective effect of N^G-nitro-L-arginine (N^5-[imino(nitroamino)methyl]-L-ornithine) against cyanide-induced convulsions in mice **(Protection against cyanide-induced convulsions may be due to inhibition of guanylate cyclase)**
by H.-a. Yamamoto (Ibaraki, Japan) 277–283
